ALE LEAD THE WAY WITH EMPLOYEE DEVELOPMENT

ALE are leading the way with employee learning and development as dozens of employees graduate from the ALE Leadership Development Programme.

Launched in 2014, the programme was designed to train and develop team members across the group using internal trainers. Since then, over 100 ALE employees across different locations and teams, from finance and engineering to commercial and marketing departments, have taken part globally.

The programme has been recognised by the Chartered Management Institute, a professional institution for management and leadership. So far, participants have graduated from the UK, France, Italy, Poland, Russia, the Netherlands, Spain, UAE, Iraq, Malaysia, Thailand, South Africa and Argentina.

Chris Hines, Global Recruitment, Learning and Development Manager for ALE, said: “At ALE, working together and developing our people is key to our company success.

“Developing and nurturing teams in their specialist fields is paramount for us to continue growing as a business, not only in localised regions but worldwide. As the programme continues to be rolled out across our global branches, I’m really proud to see the growth and development that has been achieved and look forward to seeing more team members progress through the programme.”

Notes to editors:

ALE delivers a highly tailored, end-to-end service covering every aspect of the handling, transportation and installation of heavy, indivisible loads, including lifting, transporting, installing, ballasting, jacking and weighing.

ALE delivers strategic heavy-lift services to a wide range of sectors, including civil, oil and gas, energy, nuclear, offshore, renewables, petrochemical, ports, marine, minerals and metals and mining.

ALE has more than 30 offices across Europe, the Far East, Africa, America, South America, the Middle East and Australia. It is fully compliant with international standards of safety and excellence, including Quality standard ISO 9001:2015, Environmental standard ISO 14001:2015, and Health and Safety Standard OHSAS 18001:2007.
