

**28 November 2017**

**ALE WIN SAFETY AWARD**

ALE was recognised with the ‘Excellence in Safety Performance’ award for the work performed for the Sakhalin-1 project on Sakhalin Island, Russia.

The three-year project involved the offloading, transportation and installation of process and drilling modules, with weights of up to nearly 3,000t.

Tommy Quik, who managed the project for ALE, said: “We are really proud to be recognised for our hard work and win this award. This project was particularly challenging, in consideration of remote environment, limited resources and demanding weather conditions. I want to thank everyone who has been involved in the project and made it possible to achieve this successful completion.”

**Notes to editors:**

ALE delivers a highly tailored, end-to-end service covering every aspect of the handling, transportation and installation of heavy, indivisible loads, including lifting, transporting, installing, ballasting, jacking and weighing.

ALE provides strategic heavy-lift services to a wide range of sectors, including civil, oil and gas, energy, nuclear, offshore, renewables, petrochemical, ports, marine, minerals and metals and mining.

ALE has more than 30 offices across Europe, the Far East, Africa, America, South America, the Middle East and Australia. It is fully compliant with international standards of safety and excellence, including Quality standard ISO 9001:2015, Environmental standard ISO 14001:2015, and Health and Safety Standard OHSAS 18001:2007. Further information can be found on the ALE website at [www.ale-heavylift.com](http://www.ale-heavylift.com).
